

Hibbs Healthy Homes Features & Benefits

The Hibbs Homes Difference can be seen in every home we build. High-performance building features considered premium with most homebuilders are essential to our Hibbs Healthy Homes Building Standard. This chart is to help you compare the construction benefits of building a better home with Hibbs Homes versus other builders,.

				
Tighter Homes	2x6 walls using Advanced Framing Techniques and air sealing packages limit indoor/outdoor air exchange	✓		
Premium Quality Insulation	Above-code thorough caulk/seal with spray foam & fiberglass insulation for a highly efficient & quieter home.	✓		
Low-E Windows & Doors	Heat stays in during winter and out during summer.	✓		
Low-Flow Plumbing Fixtures	Conserves water and money.	✓		
High-Efficiency HVAC System	Properly sized, zoned & tested heating and cooling systems with sealed ducts, upgraded filters & a whole house fresh air system.	✓		
High-Efficiency Water Heater	How water when you want it, for as long as you want it.	✓		
EnergySTAR Lights & Appliances	Conserves energy & saves money.	✓		
Smart Home Technology	Integrated, programmable lighting, multisource/zone audio, fire, security, TV/phone/data.	✓		
Mold Prevention	Microbe Guard spray application prior to drywall to protect your home against mold.	✓		
Moisture Constrol System	Gutter/downspout drainage plan, interior/exterior foundation drainage plan, proper exterior flashing	✓		
Low-VOC Materials	Carpet, pad, adhesives & paint with lot or no VOCs for healthier indoor air	✓		
Healthy Air System	Healthy home ventilation fans, appliances vented to exterior, and smart fresh air system to allow clean air in.	✓		
Passive Radon Mitigation	Radon Ready ventilation under all basement slabs (optional).	✓
